Dear Miss Pearson

Re: VETERINARY MEDICINES REGULATIONS 2011

A routine inspection of the above premises / records was carried out yesterday when the following matters were discussed with yourself and require your attention. The items shown in **BOLD TYPE** are **LEGAL REQUIREMENTS** under the above legislation and must be actioned. Any other items in standard type are recommendations, which are made to ensure a high standard of animal welfare and good working practices.

Medicine Records

Any person rearing/producing animals for human consumption must keep medicine records, recording the date of administration, identity and quantity of medicine, the name and address of the supplier and the identification of the animal or batch of animals the medicine is administered to.

Although you have kept a list of your medicines, you need to include dates of administering the medicines and the withdrawal periods found on the medicine box.

You were compliant in all other aspects of the inspection. If you require any further information regarding this letter, please do not hesitate to contact me.

Yours sincerely,

Warren Leach
Animal Welfare Officer
Commercial Protection
